- 1 comfortable dressing room with shared toilet facilities
- Outdoor smoking area (it is not allowed to smoke anywhere inside the building!)
- Wi-Fi available

MERCHANDISE

There is a spot in the hall to sell merchandise.

- An area of 2 x 1 meters, with a stagedeck, available for the main act and support(s).
- There is Wi-Fi available.

FINANCIAL

- No payment without passport copies or ID documents.
- Payment is by bank transfer only.

ADDITIONAL

- Guestlist, as agreed per contract, to be handed over to the stagemanager or production department.
- Use of confetti to be discussed in advance.
- For public safety reasons the air conditioning will not be shut down.

PYROTECHNICS & SFX

Pyrotechnics are not allowed at Mezz.

Use of special effects equipment only when discussed in advance.

SUSTAINABILITY

Before we dive into the technical specs of our venue, we'd like to get your attention for our sustainable goals.

MEZZ contributes towards more sustainability in music venues. We aim to minimize our environmental footprint.

TRANSPORT

As our venue is located in the city center of Breda, we don't have a lot of parking space. We'd like to see that as an opportunity to get you to carpool with your bandmates. That way we reduce our emissions. In our advancing mail you'll find the number of parking spots we have available for you.

FOOD

We believe we can also make a difference with our food intake.

We'd like to provide a healthy dressing room (more fruits and vegetables instead of chips & chocolate).

To be kind to our planet, we're also completely vegetarian.

If you have any specific wishes for catering, please let us know.

NOTE

Maximum average sound level:
103dB(A) LEQ 15 minutes at FOH

For audiences predominantly under 18, the maximum average sound levels are:

<13 years: 91dB(A) LEQ 15 minutes

14 & 15 years: 96dB(A) LEQ 15 minutes

16 & 17 years: 100dB (A) LEQ 15 minutes

This will be measured & logged according to the national covenant. We expect sound engineers to respect this limit. If the visiting sound engineer exceeds this limit and does not respond to warnings, we will be forced to limit the system.
